The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's Admitted Prior Art (hereinafter referred to as : "APA").

The following claimed limitations are anticipated by Applicant's APA as cited below:

1. A semiconductor device comprising: a substrate layer comprising a first dopant density (APA Fig.4 (N+));
an epitaxial layer comprising a second dopant density formed on the substrate layer (APA-Fig.4 (N-); and

Art Unit: 2813

a semiconductor switch formed on the epitaxial layer, wherein the semiconductor switch comprises an active region of the semiconductor device (APA-Fig.4 (21));

wherein a first thickness of the epitaxial layer in the active region is less than a second thickness of the epitaxial layer in a termination region formed peripherally to the active region (APA-Fig.4 (the thickness of N- layer underneath the gate and in the active region of the device is less than that of the termination region indicated by T_{B3})).

2. The semiconductor device of claim 1 wherein the semiconductor switch comprises a gate (G) electrode formed on an upper surface of the epitaxial layer (23) and the first thickness is a distance between the upper surface of the epitaxial layer proximate the gate electrode and an upper surface of the substrate layer (APA-Fig.4).

3. The semiconductor device of claim 2 wherein the second thickness is a distance between the upper surface of the epitaxial layer in the termination region and the upper surface of the substrate layer (APA-Fig.4 (T_{B3})).
